

< Software in case of Macintosh >

1. Quick time version 7.1

This software has been packed to HD1000 as accessory.
In case of this, it can playback Full-HD also.

2. Quick time for less than version 7.1

Customer can update by software which is packed.

3. Quick time after version 7.1 (7.2, 7.3,,for example)

If customer use Quick time after version 7.1, it cannot be supported "Full-HD" mode.

If customer installed Quick time version 7.1 after uninstalled the current Quick time once, it can palyback "Full-HD" mode.

For your reference, you can see compatibility.
