- Unplug before connecting any hose attachment accessory.

- Hold plug when they rewinding onto cord reel. Do not allow plug to whip when rewinding.
- Unplug before connecting any hose attachment accessory.
- Avoid using in a vertical position.
- If the supply cord of this appliance is damaged, ask the shop which you bought, or it must only be replaced by properly qualified service personnel because a special purpose tool is required.
- If you find the motor temperature too high or any unusual noise, should be smell or smoke found when using, stop the operation and unplug. Do not repair the appliance by yourself.

Introduction of Parts

1	Power cord
2	Handle
3	On/off switch pedal
4	Speed control button
5	Cord rewinding pedal
6	Upper cover
7	Hose socket
8	Dust bin
9	Dust barrel
10	Big wheel
11	Plastic tube
12	Floor brush
13	Integrated brush & nozzle
14	Flexible hose

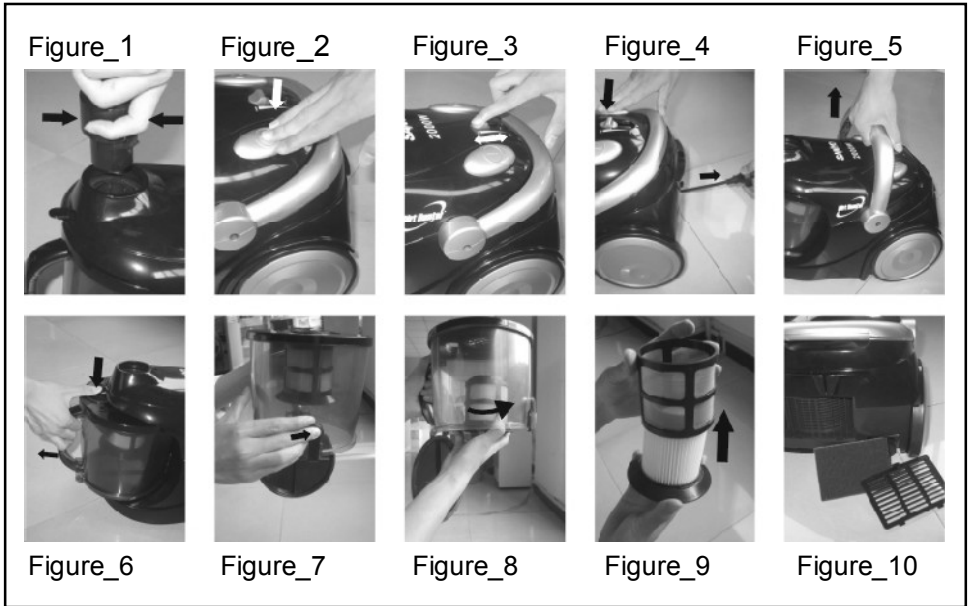

- Accessories:** 1 set hose accessory
1 piece floor brush
1 set tube
1 integrated brush nozzle.

Use Instructions

1. To connect the hose, press the buttons on the hose end and insert the hose into the hose socket until the hose locks. To detach, press the buttons and pull the hose toward you. (Figure_1)
2. Connect the telescopic tube firmly to the handle of hose.
3. Connect the floor brush or the combination nozzle firmly into the telescopic tube.
4. Before starting operation, pull out the power cord and then insert the plug into the power socket which conforms to that on the rating label for power supply.
5. Turn on the machine. Press the on/off button to start. (Figure_2)
6. The machine would start working without speed control. To control suction power, slide the speed control on the body. Suction power can also be controlled by sliding the airflow control on the hose. (Figure_3)
7. Combination nozzle. Use the crevice nozzle to vacuum edges and gaps. The head of the combination nozzle can rotate. Use the round brush to vacuum sofa, curtain or fragile or easily scratched items.
8. Turn off the machine: press the on/off switch button again, the machine is turned off. Pull the plug out of the power socket. (Figure_2)
9. Cord reminder. Before rewinding, be sure to the cord is unplugged. To rewind the power cord, press the cord rewind button. The cord will be drawn in. (Figure_4)

10. Moving the machine. Carrying it by using the carry handle. (Figure_5)

Maintenance

Caution:

Be sure to turn the power off and unplug the unit before cleaning.

1. Clear the dust:
 - 1) Take out the dust cup and empty the dust. (Figure_6)
 - 2) Clean the dust cup with water if necessary.
2. Clean Filters:
 - 1) Rotate the filter and detach from the filter grill. Wash the filter in warm water and dry completely before put it back. Be sure to dry naturally to prevent deformation. (Figure_7,8,9)

2) To clean the motor protection filter, take out the filter and wash in water. It can be used after drying completely before put it back and be sure to dry naturally to prevent deformation.

It should be washed at least once a year. (Figure_10)

If the filter is damaged, replace with new filter.

Technical Specification

Input power:	2000W
Input voltage:	230-240V ~ 50Hz
Protection class:	II
Power cord length:	5m
Dust capacity :	3L

Trouble Shooting

If you have a problem with you cleaner, consult the handy guide below. If the cleaner is malfunctioning, do not operate it before asking for service.

Noisy operation Low Suction	Clean the filter and empty the dust cup. Clean or replace the filter. Remove the blockage. Put the dust cup in place.
Over-heating/ Automatically Stopping	Clean the filters, and empty the dust cup. Check for blockages and unblock and allow it to cool. Plug unit firmly.
Cannot Find the Combination Nozzle	Nozzle is clipped into a compartment at the bottom edge on the back of the vacuum cleaner (between the wheels). It is a single attachment.
Floor Brush hard to push	Due to the strong suction power, it may be difficult to push, especially thick carpet. Rather than force to use the floor brush, lift up the Floor Brush momentarily to allow air to flow into the vacuum releasing to the built up suction pressure , then do well to push floor brush. Slide and open the suction adjusting plate located on the hose handle grip. This will reduce suction power of the floor head.
Cord doesn't fully rewind	Pull out the cord and rewind again.
