BACK-UP BATTERY INSTALLATION

Connect a standard 9V (006P/6F22) battery (not included) to the snap-on terminal matching the polarity.

1.

2.

NOTE:

If the time display is blinking when the mains returns after a failure, the back-up battery is exhausted and must be replaced.

BATTERY BACK-UP SYSTEM

This unit incorporates a battery back-up system which protects the clock, sleep timer and wake-up alarm functions from the mains failure with the battery installed. During the mains interruption, the clock display will go out, but the clock movement remains in operation. The time display will be resumed when the mains return. Reset the time if the display time is incorrect.

When the mains lead is connected to the AC outlet for the first time, or when the mains returns after a failure longer than the battery life, the display will blink. In this case, set the clock and timer again.

POWER SUPPLY

Connect the mains lead to an AC 230-240V, 50Hz wall outlet.

- The function switch is mounted on the secondary side. The unit is not disconnected from mains, even switched off.

Earphone

Connect earphone (not supplied) to the EAR socket for monitoring or for private listening. The speakers are automatically disconnected when earphone is connected,

ADJUSTING THE CLOCK

Example:

To set "PM 6:30"

1. Set the function switch to **OFF**.

2. While holding the **TIME** button down, push the **HOUR** or **MIN** button respectively to select the current time.

3. Release the **TIME** button.

LISTENING TO THE RADIO

1. Set the function switch to **ON**.
2. Set the **BAND** switch to **AM** or **FM**.
3. Turn the **TUNING** control to tune in a station.
4. Adjust the **VOLUME** control as desired.
5. To turn the radio off, set the function switch to **OFF**.

Aerials

- For **AM** reception, rotate or relocate the unit to a different position to improve the reception of a distant or weak station.
- For **FM** reception, a short wire aerial is provided. Unwind the short wire aerial and extend it to full length.
